

ABSTRACT OF THE DISCLOSURE

After the Claims, please add the following Abstract of the Disclosure, which is also submitted on a separate sheet attached hereto:

--

The invention relates to a catalyst composition comprising a salt of a non- or weakly coordinating anion, said non- or weakly coordinating anion comprising at least one metal or metalloid ion M with valency $v+$, v representing an integer between 1 and 5, and at least one bidentate ligand coordinating to this metal or metalloid ion, and a catalyst that can be activated by said non- or weakly coordinating anion, characterized in that said bidentate ligand is a bidentate monoanionic ligand of formula (I): $(R^1_q A^1-X-A^2 R^2_r)$, wherein X represents a bridging moiety; A^1 and A^2 are each independently chosen from the group comprising N, O, P, S, and C; R^1 and R^2 are each independently chosen from the group comprising an optionally substituted linear or branched (hetero)alkyl group, an optionally substituted (hetero)aryl group, and a Si containing group; and q and r each independently represent an integer with $0 \leq q, r \leq 2$.
